During the year the Diocesan Investment Trust replaced one stock investment manager who had under performed. They express confidence in their current stock managers.

The fixed-income manager under-performed its benchmark, due to over-weightings in corporate, mortgage-backed and asset-backed bonds. Hopefully, this strategy will bear fruit in the future.

For 2009, the percent of market value drawdown requested by Vestry is 4.5%, up from 4.0% in 2008. The Investment Committee believes this to be a reasonable and prudent percentage.
